

10 Principles of Building AI Agents

Learned By Building 50+ AI Agents And Copying Anthropic Research

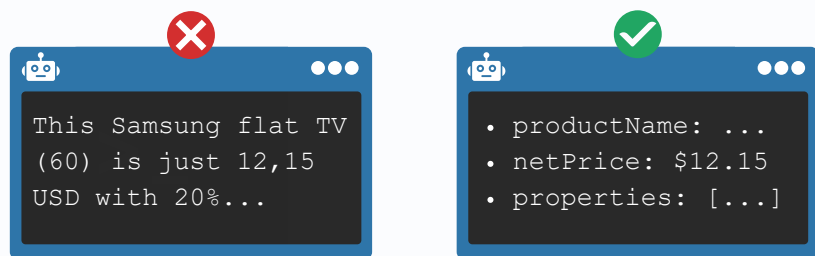

1. Don't Use Agents Just to Say You Did

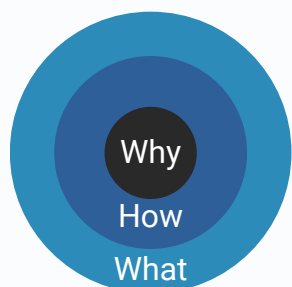

2. Small, Specialized, and Decoupled

3. Enforce Structured Output

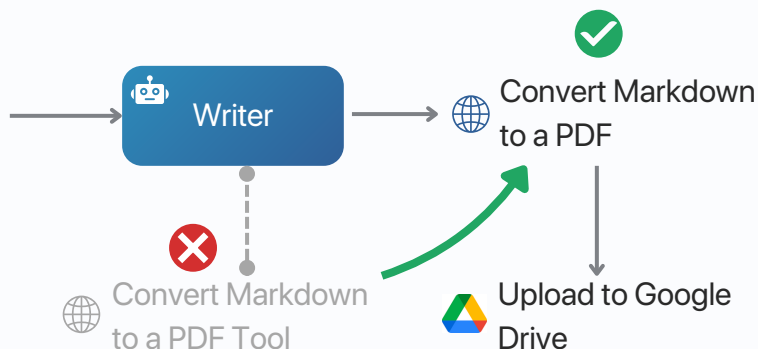

4. Explain the Why, Not Just the What

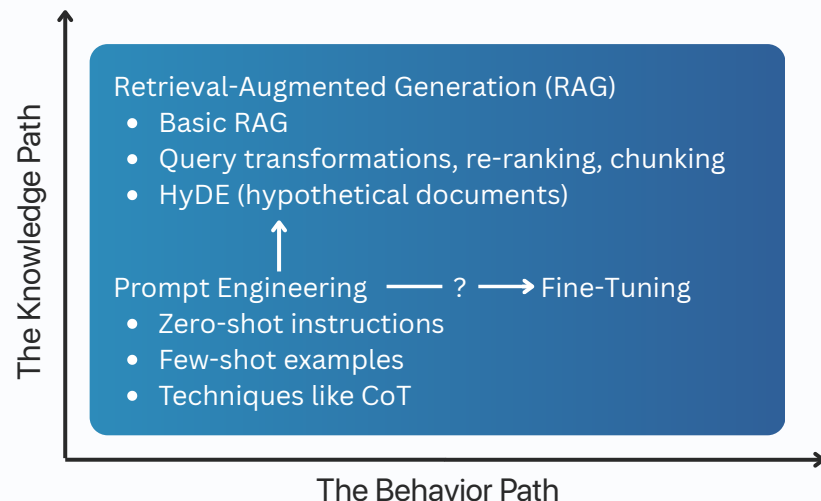

Role
You're one of **many researcher sub-agents** exploring working on the **larger initiative**:
{research_context}.

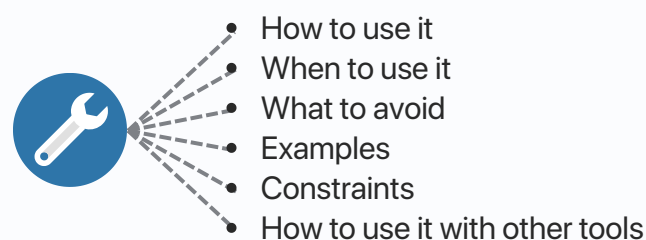

5. Orchestration > Autonomy

6. Prompt Engineering > Fine-Tuning

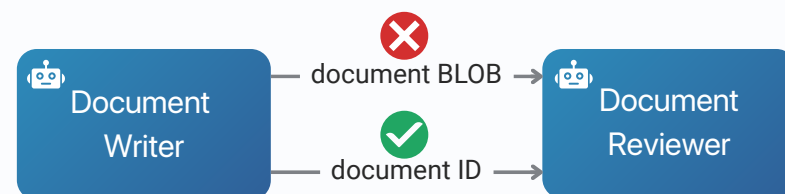

7. Double Down on Tool Descriptions

8. Cache Like You Mean It

9. Use Shared Artefacts

10. Log Everything (Seriously)
