

Which LLM Should Power Your AI Agents?

System prompt (high autonomy)

You are a helpful assistant. When the user gives you a task:

- 1. Make a plan. What information and tools and in which sequence do you need?
- 2. Then start executing that plan step-by-step
- 3. After each step, review where you are, decide whether to update the plan, and continue

User request

- Think step by step:
- 1. Create a new list inside {url} Kanban board with a list name equal to your specific LLM model
 - 2. Next, use web search to find the recent news about Amazon
 - 3. Finally, add ALL the search results to the Kanban list you created earlier

Available tools

Scratchpad

Brave Search

Get board

Model comparison (10x tests average)

Model	 GPT 5	 GPT 4.1	 4.1-mini	Grok 4	Gemini 2.5 Pro	Claude Sonnet 4	GPT o3-mini	GPT 5-mini
Opened the Kanban board	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Created a new list	Yes	⚠️ 2nd attempt	⚠️ 2nd attempt	⚠️ 2nd attempt	⚠️ 2nd, duplicated lists	⚠️ 2nd attempt	⚠️ 2nd attempt	⚠️ 2nd, duplicated lists
Used Brave Search	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Created all cards	Yes (10 news)	Yes (10 news)	Yes (10 news)	Yes (10 news + 6 videos)	Yes (10 news)	⚠️ Only 3 cards	⚠️ Only 6 cards	⚠️ Only 6 cards
Created cards in paralell	Yes	Yes	Yes	Yes	Yes	⚠️ No, 1 at a time	⚠️ No, 1 at a time	⚠️ No, 1 at a time
Used the right Kanban list	Yes	Yes	Yes	Yes	Yes	Yes	Yes	Yes
Time	4m 13s	40s	33s	3m 17s	59s	45s	41s	2m 12s
Tokens	66K	39K	41K	149K	68K	85K	74K	79K

Best practices

- Use GPT 5 ~~non-reasoning LLMs~~ by default
- Provide a scratchpad for AI agent to make notes
- Or use solution like Sequential Thinking MCP to control the process

Insights

- GPT 5 >> 4.1 > 4.1-mini > Other models
- GPT-5 is way more error-resilient
- 4.1-mini is 83% cheaper than 4.1
- Above 3-5 tools, every model makes mistakes
